KOMPOZİT MALZEMELERİN AVANTAJLARI

Korozyon Direnci
Kompozit ürünler zorlu çevre koşullarinda kullanılmak üzere dizayn edilmiştir. Paslanmaya karşı ekstra boya veya başka bir yüzey işlemi istemezler. Birçok kimyasala karşı dirençlidirler.(asitler,alkaliler, solventler) UV stabiliteleri yüksektir.

Darbe Direnci
Yapısal esneklikleri ürünlere darbe,bükülme ve kırılma dayanımı verir. Isıl genleşmeleri düşüktür. Gürültü ve vibrasyonu düşüktür.

Estetik ve Mimari Avantajları
Pürüzsüz bir yüzeye sahiptirler. Geniş bir renk yelpazesinde üretilebilirler. Metallere göre daha hafif olmalarına rağmen daha sağlamdırlar. İstenilen gerilme,bükülme ve darbe dayanımı değerlerine göre üretilebilirler. Uzun ömürlüdürler ve bakım gereksimleri düşüktür. Uygulama ve maliyetini düşürürler,hafif olmalarından dolayı kolay monte edilirler. Kendiliğinden sönebilme özelliğine sahiptirler ve yanmayı geciktirirler.
Boyutsal olarak kararlıdırlar.Zaman içerisinde ölçülerinde bir değişiklik meydana gelmez. Hurdasının maddi değeri olmamasından dolayı çalınma riski yoktur. Araç geçişleri esnasında ses kirliliğini en aza indirirler.
Kompozit ürünlerde kullanılan polyester reçine,özel pigment katkıları ile renklendirilmek sureti ile amaca uygun kendinden renkli olarak da üretilebilir.(Yüzey Uygulamaları)

BENEFITS OF COMPOSITE MATERIALS

Corrosion Resistant
Composite products are designed to be operated in harsh enviromental conditions. It does'nt require coating on the surface against corrosion for protection. Also, it has high endurance against most chemical products such as, acid, alcali and solvent. Their UV is highly stable.

Impact Resistant
The impact of structual flexibility in products gives strength towards buckling, breaking and torsion.
Low thermal expansion along with dampening of noise and vibration.

Aesthetic and Architectural Benefits
Composite products has a smooth surface. They can be produced in full range of color spectrum. Even though they weigh less, their strength capacity is stronger compared to most metals. It can be produced according to its desired values Natural Gas Consumption Box. Its more long lasting and it only requires very low maintenance. İit will also reduce cost of the application and due to its light weight it can easily be installed. They are capable of self extinguishment for retardant and combustion. Dimensionally they are very stable, throughout the time there will be no changes in its measurements. Since they have no salvage value, its rare for to get stolen. İn the context of traffic moments it minimizes the noise pollution. The polyster resin that is used in composite products are special pigments and additives that contribute color to it's form. But, it can also be produced in structural color as well. (Surface Applications)z
